

# Industry: AEROSPACE & DEFENSE

Client: \$200M manufacturer of thermal imaging technology.

We performed an audit of the company's ERP system and current installation. TriNET then prepared recommendations for optimization in the planning and order management modules. After presenting our findings and recommendations, TriNET was invited to conduct needs assessment designed to define a full optimization program including any additional customizations required as well as end-user training. The result revealed an opportunity to provide a reduction of operational costs and improved efficiencies in the order management/planning areas of the organization.
